ADV2025_208 Cisco Security Advisory (July 17th, 2025)

Cisco has published a security advisory highlighting vulnerabilities in the following products on July 16th, 2025. It is recommended that you take the necessary precautions by ensuring your products are always updated.

- Cisco Unified Intelligence Center – versions 12.5, 12.6 and 15
- Cisco Unified CCX – versions prior to 12.5(1)SU3
- Cisco Identity Services Engine (ISE) – versions prior to 3.2, versions 3.3 and 3.4
- Cisco ISE Passive Identity Connector (ISE-PIC) – versions prior to 3.2, versions 3.3 and 3.4
- Cisco Evolved Programmable Network Manager (EPNM) – versions prior to 7.1, versions 8.0 and 8.1
- Cisco Prime Infrastructure – versions prior to 3.9 and version 3.10

For more information on these updates, you can follow these URLs:

- [Cisco Unified Intelligence Center Arbitrary File Upload Vulnerability](#)
- [Cisco Identity Services Engine Authenticated Remote Code Execution and Authorization Bypass Vulnerabilities](#)
- [Cisco Prime Infrastructure and Evolved Programmable Network Manager Blind SQL Injection Vulnerability](#)
- [Cisco Unified Intelligence Center Server-Side Request Forgery Vulnerability](#)

The Guyana National CIRT recommends that users and administrators review these updates and apply them where necessary.
