

ADV2024_113 HPE Security Advisory (18th April 2024)

HPE has published a security advisory to address vulnerabilities affecting the following products on April 14, 2024. It is recommended that you take the necessary precautions to ensure your products are always protected.

- HPE Compute Scale-up Server 3200 – versions prior to v1.20.128
- HPE Superdome Flex 280 Server – versions prior to v1.70.14
- HPE Superdome Flex Server – versions prior to v3.90.18

For more information on these updates, you can follow these URLs:

1. [HPE Compute Scale-up Server 3200 server - local buffer overflow](#)
2. [HPE Superdome Flex, Superdome Flex 280 and Compute Scale-up Server 3200 Servers - Privilege Elevation and Arbitrary Code Execution](#)

The Guyana National CIRT recommends that users and administrators review this update and apply it where necessary.
